FRONT END DEVELOPER
SAN FRANCISCO, CA

EXPERIENCE

Full Stack Developer – San Francisco
Freelance
2017 - Present

• Worked with clients to build an e-commerce site better geared toward strategic business goals and optimized for cross-platform performance
• Used ReactJS for the client, paired with Ruby on Rails and a Postgresql database for the back-end

Junior Front-End Developer – San Francisco
Corsa Consulting
2016 - 2017

• Created and maintained unit tests on all front-end projects using React
• Headed all data driven UI/UX changes using user testing, mixpanel & custom data analysis engine
• Collaborated with the design team to build interactive prototypes with week long deadlines
• Utilized Git cli and Github desktop to track and version company projects
• Managed developer resources and external documentation with Confluence & JIRA ticketing

Operations & HR Manager – San Francisco
BrightPoint Security (acquired by ServiceNow) // Corsa Consulting
2015 - 2015

• Lead designers, engineers, and QA teams in migrating 25+ websites from WordPress to custom Content Management System (CMS)
• Designed and implemented custom onboarding solution to accommodate a 40% increase in staff

Auditor & Corporate Accountant – San Francisco
Pricewaterhouse Coopers // Orchard Hardware Supply
2012 - 2015

• Consistently exceeded monthly deadlines by aligning cross-functional department goals and establishing an optimized project deliverables schedule
• Provided assurance services including risk assessment, evaluating and testing internal controls quarterly 10Q filings, and year end 10K filings for Fortune 500 companies

PROJECTS

Sprint
• Built a tool that lets commuters compare destination arrival times based on mode of transit and real-time vehicle availability data
• A React app with a Node backend. Uses the Google Maps API, Restbus API, and Uber API

Outfitter
• Ruby on Rails app to help users organize, plan and store outfit ideas for optimal wardrobe efficiency
• Developed CRUD functionality, lead front end development and design for team of 3

Wayfarer
• Community based travel app where users share tips and interact through posts on city-specific experiences
• Built full CRUD RESTful routes and model schemas for cities, posts and users
